

Shape Memory Alloy **ENGINEERING**

for Aerospace, Structural and Biomedical
Applications

Editors-in-Chief

LEONARDO LECCE

Department of Industrial Engineering (DII),
University of Naples Federico II,
Naples, Italy

ANTONIO CONCILIO

The Italian Aerospace Research Centre (CIRA),
Capua (CE), Italy

Amsterdam • Boston • Heidelberg • London • New York • Oxford
Paris • San Diego • San Francisco • Singapore • Sydney • Tokyo
Butterworth Heinemann is an imprint of Elsevier

CONTENTS

<i>List of Contributors</i>	<i>xiii</i>
<i>About the Editors-in-Chief</i>	<i>xv</i>
<i>About the Contributors</i>	<i>xvii</i>
<i>Preface</i>	<i>xxiii</i>

Section 1: Introduction

1. Historical Background and Future Perspectives	3
Antonio Concilio, Leonardo Lecce	
1.1 Introduction	3
1.2 List of Symbols	4
1.3 Shape Memory Alloys	4
1.4 Gold-Based Alloys	6
1.5 Nitinol	8
1.6 Copper-Based Alloys	13
1.7 Iron-Based Alloys	15
1.8 SMA Community	17
1.9 Future Perspectives	19
1.10 Summary Tables	23
Bibliography	24

Section 2: Material

2. Phenomenology of Shape Memory Alloys	33
Vincenza Antonucci, Alfonso Martone	
2.1 Introduction	33
2.2 List of Symbols	34
2.3 General Characteristics and the Martensitic Transformations	35
2.4 Functional Properties of SMAs	39
2.5 Porous NiTi	49
2.6 Magnetic Shape Memory Alloys	50
2.7 Conclusions	53
Bibliography	53

3. Experimental Characterization of Shape Memory Alloys	57
Gabriella Faiella, Vincenza Antonucci	
3.1 Introduction	57
3.2 List of Symbols	58
3.3 Calorimetric Investigations	58
3.4 Thermomechanical Characterization: Tests and Parameters	62
3.5 Complete Experimental Characterization of Thermal and Mechanical Properties	66
3.6 Electrical Resistance Measurements	73
3.7 Neutron Diffraction Analysis	75
3.8 Conclusions	76
Bibliography	76
4. Manufacturing of Shape Memory Alloys	79
Elena Villa	
4.1 Introduction	79
4.2 List of Symbols	79
4.3 Melting Process of SMA	80
4.4 Traditional Working Process of SMA Materials	81
4.5 New Technologies of Preparation of SMA Products	86
4.6 Thermomechanical Process to Optimize the Functional Properties of SMA	89
4.7 Near Net Shape Process	94
4.8 Ecocompatibility of SMA	95
Bibliography	95
Section 3: Modelling	
5. 1D SMA Models	99
Sonia Marfia, Andrea Vigliotti	
5.1 Introduction	99
5.2 List of Symbols	105
5.3 Nonkinetic Models	106
5.4 Advanced Models with Training Effect	118
5.5 Conclusions	137
Bibliography	138
6. SMA Constitutive Modeling and Analysis of Plates and Composite Laminates	141
Elio Sacco, Edoardo Artioli	
6.1 Introduction	141
6.2 List of Symbols	151

6.3	Three-dimensional Phenomenological Constitutive Model for SMA	152
6.4	Plate and Laminate Models for SMA Applications	160
6.5	Numerical Results	166
6.6	Conclusions	188
	Bibliography	188
7.	SMA in Commercial Codes	193
	Silvestro Barbarino	
7.1	Introduction	193
7.2	Superelastic SMAs within SIMULIA Abacus Solver	194
7.3	Integration of SMAs within COMSOL Multiphysics Solver	195
7.4	Integration of SMAs within ANSYS Solver	196
7.5	Integration of SMAs within MSC.Nastran Solver	197
7.6	Applications	202
7.7	Conclusions	210
	Bibliography	210
Section 4: Aeronautics		
8.	Design and Industrial Manufacturing of SMA Components	215
	Francesco Stortiero	
8.1	Introduction	215
8.2	List of Symbols	216
8.3	Design of SMA Components	217
8.4	Manufacturing of SMA Components	231
8.5	Conclusions	241
	Bibliography	242
9.	Design of SMA-Based Structural Actuators	245
	Salvatore Ameduri	
9.1	Introduction	245
9.2	List of Symbols	247
9.3	Requirements for the Design of an SMA-Based Actuator	248
9.4	Design of an SMA-Based Integrated System: Force—Displacement/Stress—Strain Plane	252
9.5	Computation of the Working Points	254
9.6	Computation of Structural Rigidity as Perceived by the SMA Element	255
9.7	Design of an Arc SMA-Based Actuator	257
9.8	Design of an X-Shaped SMA-Based Actuator	265
9.9	Conclusions	272
	Bibliography	273

10. SMA for Aeronautics	275
Rosario Pecora, Ignazio Dimino	
10.1 Introduction	275
10.2 List of Symbols	276
10.3 Aeronautical Applications: Overview	277
10.4 Morphing Flap Architecture Based on SMA Actuators: Design and Validation Process	281
10.5 Morphing Architecture Based on Distributed Actuators within the Structure	290
10.6 Morphing Architecture Based on SMA Actuated Rib Mechanism	296
10.7 Morphing Architectures Comparison and Technology Readiness Level	301
10.8 Conclusions	303
Bibliography	303
Section 5: Biomedical & Civil Engineering	
11. SMA Biomedical Applications	307
Ferdinando Auricchio, Elisa Boatti, Michele Conti	
11.1 Introduction	307
11.2 Orthodontics	311
11.3 Orthopedics	316
11.4 General Surgery	322
11.5 Colorectal Surgery	325
11.6 Otolaryngology	327
11.7 Neurosurgery	329
11.8 Ophthalmology	331
11.9 Urology	332
11.10 Gynecology and Andrology	333
11.11 Physiotherapy	333
11.12 Other Applications: Active Prostheses and Robot-Assisted Surgery	335
11.13 Conclusions	336
Acknowledgements	336
Bibliography	336
12. SMA Cardiovascular Applications and Computer-Based Design	343
Ferdinando Auricchio, Elisa Boatti, Michele Conti	
12.1 Introduction	343
12.2 Cardiovascular Devices: an Overview	344
12.3 Examples of Computer-Based Design	354
12.4 Conclusions	363
Acknowledgements	363
Bibliography	363

13. Applications of Shape Memory Alloys in Structural Engineering	369
Costantino Menna, Ferdinando Auricchio, Domenico Asprone	
13.1 Introduction	369
13.2 List of Symbols	370
13.3 Energy Dissipation Systems: Braced Frames	370
13.4 Isolation SMA-Based Devices	375
13.5 Damping Devices for Bridge Structures	381
13.6 SMA-Based Structural Connections	386
13.7 Buildings and Bridges Structural Retrofit with SMA	393
13.8 SMAs as Reinforcing Material in Concrete Structures	396
13.9 Self-Rehabilitation Using SMA	398
13.10 Conclusions	400
Acknowledgments	400
Bibliography	401
<i>Index</i>	<i>405</i>

LIST OF CONTRIBUTORS

Salvatore Ameduri

The Italian Aerospace Research Centre (CIRA), Capua (CE), Italy

Vincenza Antonucci

Institute for Polymers, Composites and Biomaterials (IPCB), National Research Council (CNR), Portici (NA), Italy

Edoardo Artioli

Dipartimento di Ingegneria Civile e Ingegneria Informatica (DICII), Università degli Studi di Roma - Tor Vergata, Roma, Italy

Domenico Asprone

Dipartimento di Strutture per l'Ingegneria e l'Architettura (DiSt), Università degli Studi di Napoli Federico II, Naples, Italy

Ferdinando Auricchio

Dipartimento di Ingegneria Civile e Architettura (DICAr), Università degli Studi di Pavia, Pavia, Italy; Center for Advanced Numerical Simulation (CeSNA), Istituto Universitario di Studi Superiori (IUSS), Pavia, Italy; Istituto di Matematica Applicata e Tecnologie Informatiche (IMATI), National Research Council (CNR), Pavia, Italy

Silvestro Barbarino

Dynamic Systems - Rotor Structures, Sikorsky Aircraft Corporation, Stratford (CT), USA

Elisa Boatti

Center for Advanced Numerical Simulation (CeSNA), Istituto Universitario di Studi Superiori (IUSS), Pavia, Italy

Antonio Concilio

The Italian Aerospace Research Centre (CIRA), Capua (CE), Italy

Michele Conti

Dipartimento di Ingegneria Civile e Architettura (DICAr), Università degli Studi di Pavia, Pavia, Italy

Ignazio Dimino

The Italian Aerospace Research Centre (CIRA), Capua (CE), Italy

Gabriella Faiella

Institut für Kunststoffe und Verbundwerkstoffe, Technische Universität Hamburg-Harburg, Hamburg, Germany

Leonardo Lecce

Department of Industrial Engineering (DII), University of Naples Federico II, Naples, Italy

Sonia Marfia

Dipartimento di Ingegneria Civile e Meccanica (DICeM), Università di Cassino e del Lazio Meridionale, Cassino (FR), Italy

Alfonso Martone

Institute for Polymers, Composites and Biomaterials (IPCB), National Research Council (CNR),
Portici (NA), Italy

Costantino Menna

Dipartimento di Strutture per l'Ingegneria e l'Architettura (DiSt), Università degli Studi di Napoli
Federico II, Naples, Italy

Rosario Pecora

Department of Industrial Engineering (DII), University of Naples Federico II, Naples, Italy

Elio Sacco

Dipartimento di Ingegneria Civile e Meccanica (DICeM), Università di Cassino e del Lazio
Meridionale, Cassino (FR), Italy

Francesco Stortiero

Technosprings Italia S.r.l., Besnate (VA), Italy

Andrea Vigliotti

The Italian Aerospace Research Centre (CIRA), Capua (CE), Italia

Elena Villa

Institute for Energetics and Interphases (IENI), National Research Council (CNR), Lecco, Italy
